INNOVATIONS...The introduction of new ideas, is the fundamental theme that has made SOG® a name that you can depend on. We at SOG Specialty Knives are dedicated to creating the highest standards of production cutlery in the world.

The #1 Manufacturer of Specialty Knife & Tool Products

We use the strongest steels, finest materials and newest manufacturing techniques which are combined with traditional hand craftsmanship to ultimately produce the sharpest and most durable edges in the industry.

Our products utilize exciting designs that are simple yet complex and therefore are timeless in

their aesthetics and engineering. They appeal to ones basic appreciation for precision and creativity. The magical feel of SOG knives has become a trademark, perfectly balanced and sculpted for fit so that the blade does work as if on its own. SOG products are created for the enthusiast, sportsman, adventurer, professional, serviceman or anyone who can appreciate precision cutlery at its finest!

On the Cover: This high speed photograph was frozen at one millionth of a second and captures a jacketed 45 caliber bullet split after being fired from point blank range. The blade shows up white where lead has been deposited after seventeen shots.

POWER PLIER®

compound leverage

INDIVIDUAL TOOL COMPONENTS
12

The Most Ever!

• 1/2 Serrated Drop-Point Blade

• Awl

• Square Drive

• Can/Bottle Opener

• Small Blade

• Chisel

• Files—Fine, Course & Metal Sawcut

• 3 Flathead Screwdrivers — Small, Medium, Large

• Phillips Screwdriver

• Pliers, Cippers, Wire-cutters

• Double-Tooth Saw

• Measuring Scales — Inches and Metric

Length: closed 4.25", open 6.75"
Width: 1.25"
Thickness: .6" Weight: 8.3 oz
Made in the USA
Materials all Stainless Steel construction
2-way mounting, heavy duty nylon pouch

*Note that many components will interchange between the SOG Paratool and the Power Plier.

The handles held together, prevent the components from accidentally closing in use.

The Power Plier is the only tool of its kind ever built that uses compound leverage. What this means is that with the same hand strength you will generate twice the wire cutting and plier-gripping strength than all other conventional designs!!! This also translates to superior hand comfort.

The Power Plier uses our interlocking gear design that allows the pliers to be opened and closed easily with a simple one hand release... similar to the butterfly knife!

The Power Plier symmetrically opens and closes like a bank vault...smooth and powerful.

• Gear Driven

The Power Plier contains 12 individual tool blades in the handles...the most ever provided including the first 1/2 serrated drop point blade, 3 flat screwdrivers, Phillips screwdriver, #2 square drive, double tooth saw, 3-file types, can/bottle opener, small blade, awl, and chisel, as well as pliers, grippers, wirecutters, and inches/centimeter rulers.

The Power Plier can be tension adjusted and dismantled for cleaning or changing of the tool components. Use our wrench kit to make it more convenient!

USA Made.

The Rolls Royce of Pocket Tools.

PARATOOL

To Be Prepared

• Thumb Tab/Lanyard Hole

• Pliers with Fine, Medium, Coarse gripping surfaces

• Wire Cutter

• Measuring Scales: Inches & Centimeters

• 3" Straight Point Blade

• Saw Optional

• 3 Flathead Screwdrivers—small, medium, large

• Phillips #1 + Screwdriver

• Awl

• Can/Bottle Opener

• 3" Serrated Sheepfoot Blade

• Files—Fine, Coarse

—Another great design from the team of Blackie Collins and Spencer Frazer

USA Made.

"I have used the Paratool for a few weeks now and all I can tell you is that it is a wonderful tool. As an officer in the Swedish Engineer Troops, I use it hard and often."
Magnus Stridh Eksjo, Sweden

"SOG hasn't missed a trick in the design, execution or finish of this wonderful multi-purpose tool. I own all of the leading folding multi-purpose tools on the market and the Paratool is far superior to any of them. The attention to detail just isn't there in the others as it is in the Paratool. I cannot find a single flaw in the Paratool. This is the first time I have ever given a score of 100%.
Louis Coffin Reno, Nevada

"It is so seldom that a product exceeds expectations, thank you."
Rob Metcalf Madison, Wisconsin

Rating the Tools

The SOG Paratool was rated the best of multitool tested in terms of design, versatility, ease of use and function. "It delivers what it says it will and more!"

Evaluated by Michael Hodgeson who specializes in outdoor consumer reporting.

- Superior Hand Comfort
- Angled Plier Head Capability
- More Blade Components
- Adjustability

Introducing...the PARATOOL®, a most comprehensive multi-purpose folding tool chest. Named from the Latin *parare* (to prepare), the Paratool's scope of capability is impressive. This totally new proprietary tool array offers the unique combination of versatility, one hand opening, and over 20 features.

The beauty of the Paratool is in the fulfillment of its purpose. Every feature, whether mechanical or aesthetic, is dedicated to one goal; to enhance the overall experience of use. The Paratool is intended to be used for everything from mountain top adventures to paramedic rescues. It is a statement of preparedness.

Over 20 features*...An unprecedented combination of capability for its size and low cost.

*Indicates unique features exclusive to the ParaTool

Unprecedented

Paratool® angled plier head capabilities shown in use.

The PARATOOL® angled plier head* capability enables the user to get into tight spots that might otherwise be awkward to work in or inaccessible. Most effective at 140°-180°.

Size closed: 4.0" + thumb tab
Size open: 6.4" (longest plier reach in its class)
Weight: 7 ozs.
Materials: 420 Stainless Steel, low reflective surface
Pouch: Two-way black Mounting Nylon Pouch
U.S. Patent Issue #5,062,173

Now available with Black oxide finish

Why We Are Better

The PARATOOL® handles combine three different features* that contribute to unparalleled ergonomics. The handles are: smooth on the outside surfaces for hand comfort, spring tempered to act as shock absorbers when wire cutting and perforated for maximum hand traction.

To be effective, plier handles should be spread apart when the plier head is closed. Other folding designs utilizing closed handle configurations provide minimal hand leverage and typically can pinch the palm of the hand when trying to use the wire cutters.

The Thumb Tab* creates simple one-handed or two-handed opening without the looseness or sticking disadvantages found in other designs. For one-hand opening: just press the thumb tab, grab the plier head with thumb and forefinger, and open the handle against your leg or other surface.

Full size* components. Compare the long length and large width of our components

and you will realize that: 1. Shorter components cannot always reach to do the job, and 2. Our full size blade widths are stronger and more effective in most cutting situations, SOG® edges are also renowned for their sharpness and the Paratool components maintain this tradition.

Paratool handles offer easy access to all of the components. Once a component is opened for use, the handles lock back together and positively prevent the component from accidentally closing.

Hex Bolt construction allows the user to adjust* the PARATOOL for a "feel" to his or her individual liking, and also allows for the addition of accessory components* and cleaning.

The PARATOOL® is built to exacting military standards. Constructed from 420 stainless steel that is heat treated appropriately for each function, and engineered at every level for maximum strength and durability. The PARATOOL® is a superior product that promotes the highest level of standards!

Optional accessories

Double tooth wood saw
Serrated line/seatbelt cutter
Wrench kit
Leather sheath

THE TOOLCLIP®

A Toolchest in Your Pocket

The most versatile 'fixed pivot' tool ever produced, the ToolClip offers 13 powerful features to help you get the job done. This compact toolchest provides big performance capabilities and is the first of its kind to use a heavy duty clip for secure fastening to a pocket, belt, pack, or any of a variety of mounts. The ToolClip showcases a full jaw pliers, grippers, and wire cutter* combination that can be smoothly accessed and operated by one hand from pocket to work. The maximum blade sizes of the razor sharp spear-point and serrated blades provides cutting capability typically found only in expensive pocket knives. To top it off, the pry bar feature is invaluable at handling special tasks. No other product on the market today combines these unique features. It is no wonder that the ToolClip has been proven in daily use by tradesman, law enforcement personnel, ranchers, and many more.

"I purchased one of your ToolClips about a year and a half ago. I have used it constantly since then. I am a Special Agent with the Dept. of Defense...My ToolClip has been used to mend fences, open grain sacks, fix tack, and a thousand other chores. In short, I keep the ToolClip with me virtually every waking hour. I have found the quality to be excellent."
Michael A. Alaska

*The wire cutter on the ToolClip series features a proprietary angled edge for enhanced performance. This is the sharpest wire cutter you will ever use!

Dimensions: 5.25" L x 1.25" W x .5" D
Weight: 7 ounces
440 Stainless Steel
Optional Pouch available

THE MICRO TOOLCLIP®

The Biggest Little Tool Ever!

Today's world requires products that are intelligent, efficient, functional, ergonomically designed, easy to use, and imaginative. Try the Micro ToolClip on for size! This capable tool combination packs a wallop, fits in the palm of your hand, and provides an accommodating variety of carry options with a space age clip. Like its big brother the ToolClip®, it has a wire cutter* and plier combination that can be easily accessed by one hand and offers excellent cutting and gripping power on small wire or hardware. The Micro ToolClip also is uniquely clever in its inclusion of the pry bar feature, which many customers feel is indispensable when opening cans, covers, or just trying to get into a tight corner. You will also discover that the serrated and drop point blades are indicative of all SOG® products...they will hold an edge and are extremely sharp!

Dimensions: 3.75" L x 1" W x .5" D
Weight: 3 ounces
Lightweight Zytel Steel Reinforced Handles
Optional pouch available

The Micro ToolClip® is available in standard Black, Swiss Red, Emergency Yellow and Outdoor Green

AutoClip® SERIES

The AutoClip® series is a whole new concept in folding knives that takes the state of the art far into the future. We at SOG have created a systems approach to make the AutoClip one of the most functional well-integrated designs that the industry has ever seen.

We have envisioned a fast opening, easy carrying, adjustable, lightweight, sleek, affordable, and visually stimulating cutting system. This is achieved fundamentally with the introduction of our patent pending adjustable tension mounting clip. It is easily operated with a thumb wheel that allows the knife to be attached to a thick belt, a thin pocket edge, or to virtually be 'locked on' for extended carry. It solves the problems of conventional clips.

We build further on this systems approach by providing an extremely sharp 3.6" blade with bevel edge or aggressive serrated teeth for greater cutting power on fibrous materials.

The AutoClip® encompasses an opening device that Bill Scagel, the first great knife maker of the 20th Century, pioneered many years ago and that we have rediscovered. A through slot in the blade enables easy one hand or two hand opening with or without gloves.

USA Made.

These attributes are presented in an unparalleled visual format that we feel will prove itself to be the most exciting new folding knife series in the closing years of the 20th Century.

Available with Bevel Blade!

THE TOMCAT™

Knife of the Year

The TomCat™ is the state of the art in folding knife construction. This classic large bladed lockback has become the standard from which all other large pocket knives are judged. The complete stainless steel construction, featuring induction welded bolsters is matched with a most aggressive tactile, raised point Kraton® handle to create an evocative powerful feel. Winning the "Overall Knife of the Year Award", the TomCat is definitely one of the most unique knives to ever be produced and spearheads the SOG® family of products.

TomCat and Stingray now available in a Cocobolo handle.

Blade: 3.75" x .200 width Rc 56-57

THE STINGRAY™

Put a Little SOG Power in Your Pocket

The Stingray™ captures the spirit of handheld utility and redefines the pocket-knife concept. Holding it in your hand, you'll be amazed at the impeccable balance and stunning big blade feel. Beautifully ground, the Stingray blade incorporates the thickest blade for its size in the industry today. This innovative pocket powerhouse possesses other award-winning features such as the SOG® raised point Kraton® grip, induction welded stainless steel bolsters and one of the sharpest edges around.

Blade: 2.75" x .160 width Rc 56-57

THE AIR-SOG™

Flying First Class

The Air-SOG™ is one of our most popular knives. It fills the demand for a lightweight, fast-opening, multipurpose pocket knife. Small enough to be carried in any purse, coat, pack, etc., the Air-SOG™ is big enough to satisfy the variety of chores that you might require. Seldom can you find a knife that is so proportionate where blade and handle approach a 1:1 ratio. The Air-SOG also contributes to cutting comfort with its unique variable checkering that is most tactile where you need it. The Air-SOG truly flies first class!

The Air-Sog™ is also available with a serrated edge which provides more cutting power on fibrous materials such as nylon rope.

Blade: 3.25" x .160 width
440A Stainless Steel Rc 56-57
Overall Open: 7.2" Weight: 2.2 oz
Nylon Pouch

THE MAGNADOT™

*You Can Depend
On This*

The MagnaDot knife signals a new age where large blade size and light weight handle design can interact to produce a stellar package for intense cutting situations. The famous SOG thumb stud enables fast one or two hand opening of the TomCat style blade...even with gloves on. MagnaDot is a cutting system that we feel has evolved and taken the best traits from many of our other products. It is totally SOG. You can depend on this.

SEAL KNIFE-2000™ *Sea, Air, Land*

After one of the most extensive testing and evaluation programs ever undertaken by the US Government that included knives from most cutlery manufacturers in the US, we are very proud to announce that the SOG Seal Knife-2000 has been appointed the official Navy Seal Knife. The Seals are probably the most specialized elite military group in the world today. SEALS must undergo a rigorous training program that has been devised to produce the consummate warrior. Only a select few endure and are accorded the right to wear the SEAL Trident on their uniform.

This knife evaluation program included the following tests: Tip breaking strengths, blade breaking toughness, sharpness and edge retention, handle twist off

limits, two week salt water emersion tests, gasoline and acetylene torch resistance, chopping, hammering, prying, penetration, cutting of 6 different types of rope and nylon line, low noise and reflectivity evaluation, plus an intense hands on competition in the field.

The SOG SEAL Knife-2000 is perhaps the most anxiously awaited and dramatically new fixed blade to come along in years, and it's now available for the civilian market without any changes. You can be assured on this amazing knife that the SEALS have done their homework...so you don't have to.

Blade: 7" x .25 thickness

SOG NW RANGER™

Take a Little Bit of Civilization With You

The Northwest Ranger evokes the image of one of the harshest outdoor wilderness areas in the world. Sportsman, fisherman, hunters and outdoor enthusiasts require a knife that can fulfill a variety of tasks, is easy to carry, and can perform in a wide range of environments. With an elongated clip point blade, flat ground bevels, and world famous sharpness, the NWR is up to the task. Featuring a small serrated section on the blade, it leaves more traditional designs behind when extra cutting power is required. The Northwest Ranger showcases quality seldom seen even in the most expensive knives...like soldered crossguard to blade construction. SOG® is known for the comfortable feel, exceptional balance and ergonomically designed handles of its products and the Northwest Ranger maintains this tradition. When you are heading out in the wilds, take a little bit of civilization with you.

Blade: 5" x .160

SOG-TECH™ *Creating Tomorrow*

Sog-Tech™ is our high-tech fixed blade series that proves function can also be stylish. These sophisticated stainless steel knives are combined with brass crossguards and Kraton® handles for top notch outdoor reliability. The extremely sharp bevel edges are outstanding in their cutting ability and enable the user the freedom of expression

for most tasks. The SogTech™ series is the choice to those heading outward in the 1990's!

SOG GOVERNMENT™ *On Target*

Never has state of the art cutlery been so affordable! The Government's all stainless steel construction combined with a razor sharp edge ensures executive cutting performance whether on land, sea or air. SOG products are famous for their weather proof solder fits between blade and guard and the Government follows suit with this unparalleled construction feature... a first in it's class. In addition, our tough Kraton® handle with wrap around checkering provides the finest tacky grip available in any environment...wet or dry. The handle is protected by a steel pommel that offers the advantages of a field hammer. The Government is an advanced technology product capable of superior performance.

The Recon Government features the same high carbon tooling steel as our SOG Bowie and the deepest gun-blued finish available.

Blade: 6.2" x .180
440A Stainless Steel Rc 56-57
Overall: 11.25"
Nylon Scabbard

THE TIGERSHARK™

For those of you who require the full range capability that the big blade offers, the Tigershark's™ futuristic blade shape integrates chopping, slicing, and point work like never before. This modernistic bowie is manufactured from the finest exotic carbon steel and features a premier rolled edge for advantageous performance. The high tech molded Kraton handle encapsulates the Tang and provides a gripping comfort that

Pure Elegance

translates into maximum effectiveness with minimal effort. The feel is pure elegance...the feel is pure Tigershark.

Now available with new protective low reflective grey powder coating.

Blade: 9" x .250

THE PENTAGON™

On the Front Line

The Pentagon sets the policy for action. Originally designed as a back up for law enforcement personnel, the Pentagon is the first multipurpose double edge knife of its kind. The 5" stainless steel blade offers the instant choice between a serrated or bevel edge for cutting options. Twin thumb notches enable accurate blade orientation and downward control. The stainless steel crossguard is custom solder fit and makes the transition between blade and our low profile flared out Kraton® checkered handle. We think you will agree, that the Pentagon succeeds as an evolutionary achievement in cutlery.

Blade: 5" x .160 Rc-56-57
440A Stainless Steel
Overall: 9.75"
Black Leather Scabbard with
Mounting Clip

THE DESERT DAGGER™

Evolutionary Cutting

The SOG Desert Dagger was initiated from requests by military personnel. It was designed to provide an expanded capability over conventional double edge knives. This diversified knife combines 3 different edge types that enhance cutting power and is matched to a solid steel pommel for "on the spot" hammering in the field. In addition, the Desert Dagger "stands proud" with a custom feature rarely found on knives under \$250... soldered crossguard construction. The DD enlists the SOG® famous aggressive Kraton® grips for the ultimate command and control in the field. A finely tailored tactical nylon sheath completes a package that we feel is worthy of carry on any front in the world! We know you will agree!

Blade: 6.25" x .180
440C Stainless Steel Rc 56-57
Overall: 12"
Nylon Scabbard

SOG BOWIE™

Unparalleled Authenticity

Our original flagship is based on the Special Operations Group knife secretly developed and used in the Vietnam War by the 5th Special Forces and other elite soldiers. These individuals were specialists in reconnaissance, infiltration and behind lines operations. Produced in the original 800 year old samurai sword factory, this knife has become a classic that is unparalleled in authenticity and quality. The extremely thick blade and deep hollow grind make this one of the most appealing blade designs in the industry today. The blue steel crossguard, pommel and aircraft spanner nut are expertly fitted with overall attention to balance and feel. This is the Cadillac of the SOG line.

Engraved with Vietnam Special Forces Group and the SF Crest. Also available non-engraved by special order.

THE TRIDENT™

*Advanced
Sophistication*

The Trident is named after our most capable special forces unit...the Navy SEALs and displays its emblem... the Seal Trident. Only a select few survive one of the most rigorous training programs designed to produce the consummate warrior. Our Trident knife embodies the spirit with its exacting and meticulous construction. With its laser cut stacked micarta handle and surgical blade grinds, the Trident will guarantee virtuoso performance at any altitude or depth.

A non-engraved option is available on special order.

SOG Specialty Knives is more than just a knife company. It is a company with a philosophy, one that reflects an uncompromising commitment to excellence in performance and design. It is this that separates SOG products from others.

It is our belief that function and form are parallel concepts, attainable through sound design and fabrication. Our blade-ware is a handsome combination of tradition, superb craftsmanship and the latest technology.

The combination of these three translates as **WORLD CLASS CUTLERY**, *No matter how you cut it!*
