Switch-Bliver®

Model	SWPL76 SwitchPlier
Length Open	6"
Length Closed	4.2"
Weight	5.5 oz
Features	Powder Coated Aircraft Aluminum Handle Locking Components

SwitchPlier

Ready, set, switch! Push a button and *Pow!* The world's first automatic plier springs into action faster than you can say, "Fix it!" Our patented SwitchPlier is the ultimate one-handed opening wonder that tackles light to moderate jobs. It is also compact, has spring-back pliers, and the luxury of comfortable grips. Nestled within the aircraft aluminum handle are five locking tool components which include: can opener/small screwdriver, half-serrated blade, bottle opener/medium screwdriver, three-sided file/large screwdriver, and an innovative 1/4-inch socket drive. Stainless steel SwitchPlier travels well in its unique form-fitting nylon pouch with sturdy clip for versatile attachment. Your buddies won't believe this one!

Vision Series

The radical, award-winning Vision folder with its geometric grind lines and sleek titanium handle has now become a series. Enhanced with our revolutionary new Arc-Lock, there are now three versions of this extreme blade upon which to focus your sights—Vision, Night Vision, X-Ray Vision. Having a Vision blade is like having three working knife edges in one! All three models include reversible clips, ATS-34 custom steel blades and dual thumb studs.

Arc-Lock

The Arc-Lock just might be the perfect lock. Why? It is totally **ambidextrous** and has all of the attributes knife designers relentlessly search for, but rarely find. **Strength:** Arc-Lock far surpassed conventional lock strength, testing at over 1000 lbs of force measured at the lock in an independent lab test. **Speed:** Arc-Lock provides lightning-fast, one-handed opening and closing capability. **Safety:** Spring-action ensures that the blade is securely retained within the handle when closed. **Durability:** Arc-Lock is self-adjusting over time and easily cleaned for long-term optimal performance.

Night Vision

The Night Vision combines the original Vision blade with G-10 handles. G-10 is known for its toughness, non-reflective nature and non-slip texture.

inary Tools & Blades

X-Ray Vision

The X-Ray Vision with finely textured black Zytel handle and bead blasted blade finish is designed not only for performance, but also for value.

Model	S64 X-42 AutoClip
Blade	3.6"x.115"
Overall Length	8.25"
Weight	2.6 oz
Features	Steel: BG-42, Rc 62-64 Black Zytel Handle

X-42 AutoClip

"I just hate it when that happens!" You reach for your knife and it's not there. To avoid such a loss, we've developed the AutoClip series. The patented, ingenious, clip-on device allows the knife to be attached to almost any thickness of material and to be virtually locked on with the turn of the thumb wheel. Combine this clever feature with one of the raciest blade designs you will ever see, produce it out of BG-42 steel and you have one amazing lockback.

The X-42 AutoClips are available with straight or serrated blades as well as with SOG's Black TiNi Hardcased Coating.

BG-42 Steel

BG-42 stainless is the knife steel of the future! Used for years to make high-speed ball bearings and jet engine parts, it is exceptionally strong, corrosion resistant, and has an optimal Rockwell hardness that ranges from 61-64. Custom knife makers have long raved about its exceptional edge-holding properties and razor-sharp cutting performance. Previously due to its high cost, difficulty to manufacture, and special cryogenic heat treating, BG-42 had not found its way into a production knife. SOG is the first to offer this high-performance, exquisite steel at an affordable price. Not only are we breaking new ground, we're shattering existing price points for exotic, custom steel. The end result is a superior working knife with an unbelievable edge that will last much longer between sharpenings.

Model	S84 Mini X-42 AutoClip	Model	RFB81 X-42 Recondo
Blade	2.9"x.100"	Blade	5.3"x.160" (full tang)

Features	Steel: BG-42, Rc 62-64 Black Zytel Handle	Features	Steel: BG-42, Rc 62-64 Black Zytel Handle, Kydex Sheath, Lanyard

X-42 Recondo

The X-42 Recondo is named after the MACV Recondo School established during the Vietnam War to train Special Forces Units in Recon tactics and Commando operations. Training was relentless and included performing critical missions behind enemy lines. The courageous spirit of this specialized school and its graduates is carried on in the X-42 Recondo that proudly bears the name. The X-42 Recondo combines advanced technology with an extreme configuration for a knife designed to meet the challenges of today's world.

A SOG evolution in blade design, the X-42 Recondo features wicked grind lines which focus power on the edge and tip of the intensely sharp blade. The balance, feel and quickness of this knife is extraordinary. The Recondo's glass reinforced Zytel handle is designed to provide maximum gripping, the ability to "index quickly" in low light as well as to move fluidly from front to reverse gripping positions. With the use of BG-42 ultimate steel, this is truly one serious fixed blade. A knife this good should be carried in an equally good sheath. Our new Kydex sheaths exceed all previous standards. They are military belt and jump rated in addition to being quiet, self draining and secure.

Pentagon Elite Series

Since its debut, the Pentagon Elite has achieved great popularity among the military and law enforcement community as well as the general marketplace. This year, we have added the new Arc-Lock to the Elite and have created a larger version, the Pentagon Elite II, our first 5" folding blade! The monster truck of tactical folders, the PEII is like having a fixed blade in your pocket. These awesome blades are totally ambidextrous and feature the Arc-Lock for fast-action.

PE18

Creators of Extraord

The Pentagon Elite knives are impeccably balanced and feature ergonomic glass and Kevlar-reinforced Zytel handles, SOG's "shark tooth" tip for reinforced point strength, steel liners, machine screw construction and reversible military-style clips that also enhance gripping.

Vino

A modern design with a classic purpose, the SOG VINO is a sophisticated statement for all wine connoisseurs, professional waiters and those who appreciate a finely crafted tool. The VINO's ergonomic, contoured, aluminum handle creates exceptional balance and leverage. Its polished, stainless steel components include a five-spiral grooved auger for smooth cork removal, an extremely sharp serrated foil knife with thumb stud and a lever which doubles as a bottle cap opener.

inary Tools & Blades

Access Card

Designed to be carried comfortably in wallet, pocket, pack or virtually anywhere, the Access Card is a 21st century folder that has no boundaries. Crafted with elegant, slim-line stainless steel, this 2.7" uniquely sculpted blade opens and closes with one hand swiftly and smoothly. This is accomplished with SOG's new Arc-Lock mechanism that is strong, silent and secure. Access Card's combination clip cleverly and securely holds bills while a secret compartment hidden within the handle encases a useful tweezers, toothpick and eyeglass screwdriver.

Recon Bowie

While we are introducing many new futuristic products, we have not forgotten our roots. The SOG Recon Bowie builds on the tradition of the original Special Forces bowie upon which SOG was founded and which has become one of the finest fixed blades in the world today. The original Recon was the first knife developed and procured by SOG personnel in the Vietnam War. It was designed for SOG's clandestine and cross-border Recon teams which experienced vicious, close-quarter combat. Today, there are only a handful of these extremely rare and valuable knives remaining. An exquisite design of the highest caliber, the SOG Recon Bowie captures the essence of this positively unique fixed blade.

Creators of Extraordinary Tools & Blades

Model	SBR80 Recon Bowie
Overall Length	12"
Blade	7"x.225"
Weight	11.75 oz
Features	Gun-blued SK-5 Carbon Steel Epoxied Leather Washer Handle Leather Lanyard & Sheath.

Creators of Extraordinary Tools & Blades

Distinctive, elongated grind lines abound on the Recon Bowie's deep hollow ground blade. Like the original, it is created with the same high-carbon SK-5 steel and gun-blued for stealth. The brass crossguard and pommel, expertly fitted spanner nut, epoxied leather handle, and lanyard further add to its authenticity. This classic fixed blade is truly a useful and stunning knife to own and carry.

The SOG Story

SOG originally stood for Studies and Observation Group, an elite joint services military group designed for covert operations in the Vietnam War. Sanctioned to develop and purchase their own equipment, SOG created a knife for use in one of the harshest environments in the world. It is in the spirit of this elite group that SOG Specialty Knives was founded. Totally committed to creating the world's finest, specialized knives and tools, SOG became the first knife manufacturer to expand its line to include a broad scope of fixed blades, folding knives and multipurpose tools. Co-founder and Chief Engineer, Spencer Frazer, designs each SOG product. His patented inventions and unique, futuristic style have earned SOG many awards. Frazer is recognized as an industry innovator and premier designer. Today, SOG products are distributed around the world and renowned for their uncompromising style and performance.
